12	9	10	1	2	3	4	18 
20 	5	6	7	8	9	10	36

How to play

Throw the dice and move your counter. When you land on the square you must work out two factors of your number and cover the appropriate numbers in the middle.

If you land on a square with a star then you get another turn. If your partner gets the answer wrong you may claim the square.

If the answer to your question has already been taken, you may steal a square belonging to your partner.
